

Lawn Care & Maintenance Machinery - **Catalogue 2025**

Clean up your World™ with Billy Goat!

Thank you for your interest in Billy Goat! For more than 50 years, Billy Goat® has been the leader in making properties across the globe look fantastic. The equipment in this catalogue represents the best in specialty turf products with close attention to detail in an effort to make Billy Goat products simple to operate, highly productive, less fatiguing, and a pleasure to use!

Inside you will find innovative features like advanced hydrostatic drive systems and intuitive controls in our brush cutters, aerators, and turf cutters that take the guesswork out of ground speed and direction; customer-friendly ergonomics that reduce noise, weight, dust and vibration across the line.

Rest assured that Billy Goat products are customer focused, engineered and rigorously field tested to our customer's highest requirements which is why they are known for their outstanding durability and rugged performance year after year.

When it comes to cleaning up, Billy Goat features leading solutions for all your residential, commercial, and municipal cleanup needs. We invite you to review our range, refer to our website, watch our videos and work with our worldwide network of stocking and servicing dealers to pick the machine that is right for your cleanup needs.

Yours sincerely,
Billy Goat Industries.

Turf and renovation projects for the perfect property

Keep your lawn in perfect condition with Billy Goat turf and renovation machines. With our powerful power-rakes you can remove thatch from turf the fast way. Our aerators let air in by the roots. Get to know our turf-cutters for the easiest way to remove turf for your renovation projects or installation of pipework for irrigation in your lawn.

All the machines are made for durable and efficient working. They are very easy to operate making the whole range ideal for residential, professional users and hire companies.

Ground Care - Power Rakes

PR Series

PR551V (2691999)

The PR Series efficiently removes matted thatch from turf in 20" / 51 cm passes, and its rugged design withstands the most demanding use. The rotation of the flail blade shaft is clock wise, this propels the PR forward, making it self propelled.

As the PR Series weighs slightly more than other power rakes on the market, with steel guards, heavier wheels, premium bearings, and a 3.6 mm steel engine base, the PR absorbs much of the vibration before it is transferred to the handle, which improves operator comfort and handling.

The PR comes standard with Vanguard™ power coupled to a free swinging, heat treated, tempered flail blade reel, mounted to heavy-duty cast iron pillow block bearings with grease fittings.

The PR is convertible to an overseeder or vertislicer with optional accessories.

Features

PR Series

Heavy Duty Depth Adjustment

Save on blade wear when compared to pre set adjustments that may promote premature flail wear. +12mm to - 25mm.

PR Flail Reel

Heat treated and tempered blades stand up to heavy use.

Foldable Handles

Great for storage, transport and longer life.

Premium Construction

Steel pulleys, easy to adjust idler and easy to change belt contribute to long life. Protected by a steel guard.

Accessories

Vertislcing Reel

Perfect for thinning running grasses, improving drainage and overseeding. (80023141)

Overseeder Conversion Kit

Convert your Power Rake to an Overseeder. (80023050)

Cam-driven Aerator

PLUGR®18

PL1803V (2691897)

This compact 18" (46 cm) aerator is ideal for smaller property aeration or hire companies and features reciprocating cam tines that propel the unit forward and drive cores up to 7 cm deep. The unit can aerate up to 2,000 m² per hour, is simple to operate for homeowners, easy to steer without lifting and requires no add-on weights.

The easy folding handle allows for compact transport and storage. Only four tines and no chains along with a no-tool removable cover make for easy maintenance.

This PL1803V model is powered by a reliable Vanguard™ engine.

The Benefits of Aeration

The purpose of aeration is to improve the exchange of air and the penetration of water and fertilisers in the soil.

If turf is trampled and walked over continuously, the lawn develops a compact surface that leads to degradation of the lawn surface.

Features

PL 18 Series

Easy Fold Handles
Folding handles provide compact transport and storage.

ISO Mounted Handle
ISO mounted folding handles help reduce vibration and offers fatigue free operation so you can complete more work in less time!

Cam-Driven Aerators
Punches tine core depths to 7 cm even in hard soil conditions. Spring loaded rotor assist for aggressive forward motion of the tine rods.

Tensile Hardened Thin Wall Tines
Simple, durable screw-in design makes service simple. Four tines on PL18 Series.

Ground Care - Turf Cutters

SC18 Series

SC181H (883095)

When it comes to durability, the Billy Goat SC18 Series Sod Cutter sets the standard. Its rugged 23 kg steel frame and heavy-duty drive and cut system are built to handle New Zealand's varied terrain and tough working conditions.

The hydrostatic variable-speed transmission gives you full control to match your cutting speed to the ground you're working on – forward or reverse – making every job smoother and more precise.

The SC181H model comes fitted with a rear caster wheel for easy curved cuts, which can be locked in for straight-line work. Handle isolation mounts absorb vibration, giving you a smoother ride and reducing operator fatigue. Smart features like a built-in hour meter, heavy-duty front bumper, and six tie-down points make transporting and servicing the unit easy.

Powered by a trusted Honda engine with a 3-year warranty, this 46 cm (18") hydro sod cutter is the go-to machine for landscapers, tradies, turf professionals, and anyone working in irrigation, hardscaping, sports fields, golf courses, or flatwork across Aotearoa.

Features

Unique Paddle-Style Drive Wheels
SC181H model. For landscape applications. Designed to shed mud in wet conditions and grip in dry for improved cutting in all conditions.

Tie Down Points
Convenient tie-downs make machine transport safe.

Rear Swivel Caster
Perfect for curved work or making turns at the end of a pass. Locks for straight cutting.

Vented Housing and Service Doors
Provides increased venting for cool operation. Three easy access service doors located at front / back of machine offer convenient access for servicing.

Set and Forget™ Blade Depth Adjustment
Single lever and clamp at user's operating position adjusts simply, saving time and providing precise cutting depths to 6 cm.

Meadow and brushcutting the easy way

The Billy Goat brushcutters are made for cutting through overgrown bush, fields, clearing meadows or hiking trails. It doesn't matter how much area you have to mow with our walk behind brushcutters we always offer a suitable solution. All the units carry rigid mowing decks with heavy duty spindles. Combined with a powerful engine, no job is too tough.

The ergonomic controls make these brushcutters a perfect partner in the harshest of environments.

Swivelling Front Caster Wheels

The swivelling caster wheels provides stability to the pivoting mower deck to cut bushes and weed evenly at higher heights up to 9,5 cm tall.

BC2600 Series - Pivoting Deck

BC2601HHC (1697412)

Ergonomically angled handles with padded grips offer comfort and protection. Never take your hands off the machine to shift gears with conveniently located infinitely variable speed controls.

The BC2601HHC model introduces lockable front caster wheels for better hillside performance. The caster wheels also allow the brushcutter more mobility when being turned.

This model is equipped with a powerful Honda GXV390 Engine

Hydrostatic drive & swivel wheels.
Ideal for rough terrain, hills and high brush

Product shown:
BC2601HHC

Cutting & Mowing - Brushcutters

Features

BC2600 Series - Pivoting Deck

Pivoting Rear Discharging Deck

+/- 12 degree and 66 cm wide pivoting deck with proprietary return to neutral is engineered to glide over uneven terrain and deep brush. All NZ models come equipped with Castors.

Wide Tyres

Wide Foam Filled Tyres for better traction and less down time.

Heavy Duty Blade Spindle

Reinforced in four directions for maximum durability and safety, so you can keep cutting in the harshest conditions.

Rubberised Rear Deck Trim

Allows for easier stump clearance in reverse.

Intuitive Drive Controls & Handles with Padded Grips

Best in class control package allows the user to feather in forward and reverse directly from the handles - no shifting required.

Tuff Torq® Hydrostatic Transaxle

With ETC (Enhanced Traction Control) is fully automatic, sensing when the rear wheel starts to spin, locking the wheel to provides superior traction on hills or in wet and uneven conditions.

Clean up with our vacuums

From small property residential to large property commercial leaf clean-up, Billy Goat's full line of Debris equipment gets your job done easy and fast. With the biggest range of vacuums you always find the best machine.

If you have to manage big amounts of leaves or rubbish, let us convince you by the power of our debris loaders.

Check on the next pages which machine fits your job.

Debris Management - Leaf & Litter Vacuums

Easy operation

Model shown:
KV601 With optional hose kit

KV Series

KV601 (883218)

Powerful suction and easy operation make clean up a snap for leaves, seeds, mulch, blooms, branches, litter and debris. Ideal for multi-surface residential and light commercial use, Billy Goat's versatile 69cm / 27" wide lawn and litter vacuum has variable height adjustment for hard surface or turf work. 30cm / 12" tyres on the push vacuums and rear wheel drive on the self propelled vacuums makes operation easy, even in hilly environment. The KV Series vacuum are powered by trusted Briggs & Stratton engines.

KV Series Features

Robust Transmission
Single speed self propelled.
Great for hilly turf applications.
KV601SPH

Integral Dust Skirt
Keeps dust down and away from
the operator.

5-Blade Serrated Impeller
Maximizes suction, long life time
and debris reduction.

Integrated chipper

TKV Series

TKV601SP (2691990)

The 69 cm / 27" TKV Series lawn and litter vacuum offers all the great features of the KV Series but has an integral on-board 5,1 cm / 2" chipper. Now you can add branches to all your leaf, seed, blooms, mulch, litter and debris clean up jobs. The TKV self propelled Honda powered vacuum takes the chore and fatigue out of hilly turf clean up.

KV Series Accessories

Caster Wheel Kit
Increases manoeuvrability.
(80023276)

Nozzle Wear Kit
Prevents nozzle wear on hard surface applications.
(80023275)

Liner Sleeve
Protects housing in sandy conditions.
(80023278)

Shredder Screen Kit
Reduces dry leaves up to 12:1.
(80023256)

Debris Management - Leaf & Litter Vacuums

MV Series

MV601 (2691991),
MV601SP (2691992)

Step up to the heavy-duty clean up power of the MV Series 74cm/29" wide lawn and litter vacuums.

Designed for both hard surfaces and turf, the MV Series is ideal for larger properties, commercial lots, leaf clean up, hire companies, parks, city streets, school districts or municipal clean up. Powerful 6-blade serrated impeller for maximum suction and debris reduction. Picks up cans, bottles, grass clippings, litter and other debris with ease. Abrasion-resistant composite housing components reduce weight and won't rust or dent.

The MV Series vacuums features the option of push unit and self propelled, 3 speed drive.

Model shown:
MV601SPH with optional hose kit

Debris Management - Leaf & Litter Vacuums

Features

74 cm / 29" Gobbler Door

Adjustable from the operator's position for easy switching between hard surface, turf or hose applications.

Unique Top Fill Design

Keeps dust out of operator's face and ensures optimum filling.

Top Loading Bag

Slides in and out on rails for best in class unloading. The 151 litres mesh bag holds up to 23 kg of debris.

Easy Control of Height

Crank style for optimum performance on turf and hard surfaces.

3-Speed Transmission

The MV Series self propelled models are equipped with a 3-gear ultra smooth and durable transmission.

36cm / 14" Wheels

The 14" wheels smooth out the rough areas and make the vacuum manoeuvrable.

Accessories

Electrostatic DUST SOCK™ Kit

Traps dust for optimum operator and air quality protection. (80023248)

Disposable Bag Liners

Eliminates the extra step of bagging your debris. Pack of 12. (80023242)

Caster Wheel Kit

Increases manoeuvrability. (80023241)

MV Series Hose Kit

MV Series vacuum with optional hose kit attached to the gobble door. With telescopic handle. Diameter 12.7 cm / 5". Length 305 cm / 10'. Model shown: MV601SPE. (80023240)

Model shown:
QV550HSP with optional hose kit

**Low dust, low noise
with QuietVac™**

QV Series

QV550VSP (2692012)

Billy Goat's 84cm / 33" QUIETVAC™ is the world's quietest vacuum. It's unique cyclonic filtration with exclusive Dust Sock™ technology that dramatically reduces dust in dry conditions.

The housing and 6-blade armour plate steel fan combination provide optimum suction power and 12 to 1 debris reduction for composting in dry conditions.

This hard surface machine is ideal for contractor use and municipal clean up applications such as tarmac, school campuses, hospitals, parks, churches, airport pedestrian areas, resorts, city streets and pavements. propelled vacuums, equipped with a professional Vanguard™ engine.

Debris Management - Leaf & Litter Vacuums

Features

QUIETVAC™

As low as 97 LWa and 77 dBA at full rpm and 96 LWa and 76 dBA at 2800 rpm.

Debris Bag Dust Skirt

The QV Series vacuums are standard equipped with a debris bag dust skirt. (80023226)

Turf Bag

Large 136 litres turf bag with 4 hooks. Loading and unloading is fast and easy. (80023091)

Powerful Suction

Unique housing and fan system provides the best suction power of any vacuums on the market today.

Durable Front Casters

Roll smoothly through turns and over uneven surfaces.

Easy Steering

Thanks to the clutches on the handlebars the QV Series is easy to manoeuvre, even in the most restricted areas.

Hydrostatic Drive Transmission

The self propelled models have a hydrostatic transmission from 0-3 mph (0 ~ 4.8 km/h) with infinite forward and reverse.

Unique Cyclonic Filtration

The cyclonic filtration system, when combined with exclusive DUST SOCK™ technology, dramatically reduces dust in dry conditions, providing the ultimate in operator comfort.

Electrostatic DUST SOCK™

The DUST SOCK™ acts as a secondary filter lowering the amount of dust that escapes the bag. It is used in dry and dusty conditions only.

Accessories

Replacement Bag

Replaces the original vacuum bag. 136 litre capacity. (80023091)

Collapsible Hose

5" x 10' (12.7 x 305 cm) hose; hand extension for best in class ergonomic use; on board storage. (80023223)

Liner Sleeve

Protects housing in sandy conditions. (80023085)

Electric Start

DL 14 Series

DL1402VE (2692013)

The new DL1402VE is a versatile debris loader ideal for contractors, stables and mid-sized municipal applications. The heavy-duty DL1402VE offers an all-new discharge chute for rugged wear and long life productivity, and features a dual shredding 16" diameter armor plate impeller with Piranha™ blade that reduces debris up to 12:1. With standard electric start, the DL1402VE makes cleanup even easier.

The 25 cm intake hose is a 300 cm long, clear poly helical coil.

Dual Shredding and CustomFit™ mounting options are available on all Debris Loaders.

Debris Management - Debris Loaders

Features

Dual Shredding System with Piranha™ Blade
For extra shredding. Serrated blades with cutting points for maximum loading. Debris reduction up to 12:1.

Safety Kill Switch
Quick connect / release hose clamp with safety interlock.

Urethane Clear Hose
Clear hose allows for visual inspection and quick removal of hose clogs. Replacement hoses are available.

Intake Hose Storage
Simple secure nozzle hook for convenient and efficient storage.

Adjustable Rotating Discharge Chute
No tool, hand adjustable rotating discharge chute allows 360° positioning.

Accessories

CustomFit™ Receiver Hitch
Simple to install and remove and easily mounts to your truck for use with DL14 and 18 loaders.

CustomFit™ Hanger Kit
Easy to install, locks in place with 2 bolts. Suits DL14 and DL18 loaders.
